OBJECTIVE

I'm a certified Cloud Engineer with 6+ years of experience in AWS, CI/CD, IaC and Microservices. Highly skilled software developer in Python, Deep Learning, Machine Learning and Data Science. Currently, orchestrating and automating cloud solutions for digital automation and energy management.

EXPERIENCE

Lead Cloud Operations Engineer
K-LAGAN

Jun 2024 - Present
Remote

Cloud Operations Engineer for a multinational cooperation specialized on digital automation and energy management with presence in more than 100 countries.

- More than \$10k USD saved per month by optimizing production and lower environment snapshot policies.
- More than 100 cloud based servers migrated for major Linux updates.
- Technical Level 2 and Level 3 help desk support for more than 50 development and service teams around the world.
- Resource administration for more than 500 accounts spread around the world including EC2, EKS, S3, ELB, CloudFront, IAM and many others.
- Resource deployment for development solutions through automation tools like Ansible, GitHub actions and Terraform.
- Monitoring and maintenance activities to guarantee high reliability and availability monitoring for thousands of critical servers, applications and services placed on cloud.

Skills: CI/CD · Terraform · Ansible · Troubleshooting · LogicMonitor · Monitoring · Infrastructure as code (IaC) · Amazon Web Services (AWS) · Python · Veeam · Kubernetes · Linux · Github · Automation · Dynatrace

Cloud Operations Engineer @ Southwest Airlines
Softtek

Feb 2021 - Jun 2024
Remote

AWS Cloud Services Administrator, Site Reliability Engineer, Python Developer and Incident Troubleshooter for more than 500 cloud accounts of the world's largest low-cost carrier. Daily activities consist in dev operations, API development, pipeline automation, cloud support and monitoring.

- Selenium automated smoke test for 36 End User Authentication endpoints.
- AWS AHA module for events delivery on ServiceNow dashboard.
- Grafana monitoring dashboards for AWS TGW and AWS DX traffic.
- Python onboarding library for Nexus and artifact pre-validation job for Gitlab CI/CD
- 50 hours saved annually by building Gitlab CI/CD pipelines to query and delivery 20 AWS and cloudability resource mapping reports.
- 20 hours saved annually by building an AWS Application for intelligent Jenkins volumes management and deletion.
- 20 hours saved annually by building a Gitlab CI/CD pipeline to query, delete and reuse Atlassian App's user licenses using AWS SSM documents and SQL.
- Gitlab CI/CD integration test pipeline used by a TLG with more than 100 Distributed Deployment Engine Projects.

Skills: CI/CD · Terraform · Cloudformation · Troubleshooting · API Development · Monitoring · Infrastructure as code (IaC) · Amazon Web Services (AWS) · Python · Docker · Kubernetes · Grafana · Jenkins · Gitlab · Automation

Jr. Research Fellow
CONACyT

Jan 2019 - Dec 2020
Monterrey, Mexico

Funded Jr Researcher for a cloud classification project of breast, colon and lung cancer histopathological images using Deep Learning and Machine Learning techniques. Project developed using Python, Pytorch, Keras, Pandas, Sci-Py and Scikit-learn, performed on Google Cloud and AWS services. More than 95% of accuracy for tissue classification using Keras CNN. More than 90% of accuracy for tissue classification using 5 computer vision techniques and 10 ML techniques.

- More than 95% of accuracy for histopathological tissue images using Keras CNN.
- More than 90% of accuracy for histopathological tissue images using 5 computer vision techniques and 10 ML techniques.
- 10 Google Cloud automated playbooks and jobs for image cropping and classification.

Skills: Convolutional Neural Networks · Machine Learning · Google Cloud Platform (GCP) · Deep Learning · Python

EDUCATION

Master of Science MS, Computer Science, Tecnologico de Monterrey Grade 9.6/10
Member of the Bioinformatics Research Group, CONACyT Full-ride Scholarship Award

Bachelor of Information Technology, Universidad de Guanajuato Grade 10/10
Outstanding Student Award

LICENSES & CERTIFICATIONS

DevOps with Docker , University of Helsinki, Certificate ID: [56c728eb326ae](#)

Containers, K8s and Istio on IBM Cloud , IBM, Badge ID: [wlkiAn4i](#)

AZ-900: Microsoft Azure Fundamentals , Microsoft, Certiport ID: [wNJYM-2FqG](#)

AWS Certified Developer Associate , AWS, Badge ID: [378dfe4dc1e1](#)

AWS Certified Cloud Practitioner , AWS, Badge ID: [bef76c68e394](#)

AWS Knowledge: Networking Core , AWS, Badge ID: [448b199a57de](#)

Google Grow: Cloud Computing , Google, Certificate ID: [DS8 4NF NY8](#)

PUBLICATIONS

Histopathological Image Classification using Deep Learning (Nov, 2021) ([repositorio.tec.mx](#))

This thesis presents a study of digital pathology classification using and combining several techniques of machine learning and deep learning.

A Further Search for Galactic Stars with Double Radio Lobes (Jun, 2017) ([arxiv.org](#))

Further search for double-lobed radio stars in two samples of spectroscopic stars: over 20,000 white dwarves from the Sloan Digital Sky Survey and 2.5 million stars from the Large Sky Area Multi-Object Fiber Spectroscopic Telescope.
